RECONSTRUCTION  
CONTRIBUTES TO ANOTHER  
WOMAN'S CURE**

# SIENTRA FULL CIRCLE™ CONNECTS THE DOTS TO A BRIGHTER FUTURE FOR THE BREAST CANCER COMMUNITY

At Sientra, we believe that full commitment to a cause is about more than offering products and services. Full commitment requires giving back so that philanthropies focused on improving the experience of patients with breast cancer can receive the support they need. That's why we founded Full Circle, a first-in-kind charitable program to aid nonprofits in the breast cancer community. We aim to connect with people and organizations committed to making a meaningful difference and invest in them.

For every breast tissue expander sold, Sientra will donate a portion of sales to the Full Circle fund. Full Circle grants are open to any U.S.-based breast cancer organization working towards furthering breast cancer aid, research, patient outreach and advocacy, and prevention. Grants will be dispersed to nonprofits with the most promising visions for the future.

“

I am excited about Sientra's Full Circle program. It is great to see the company's unique dedication to breast reconstruction patients by giving back to organizations who can make a difference.

BECAUSE MAKING A  
DIFFERENCE TOMORROW  
**STARTS TODAY**

**KEEP GIVING GOING...**

Grants will be provided to external, independent organizations that are U.S.-based only (as provided) and not-for-profit or 501(c)3 tax status. Funding is determined on an annual basis. Prior funding allocations do not guarantee future grants. Sientra does not receive any significant value in terms of goods or services in return for its grants. Application and use of grant funds will be reported in compliance with the Federal Physician Payments Sunshine Act.
